# Green Public Procurement support plan for 2015-2017

## GPP target

## Lines of activity

Ministry of Environmental  
Protection and Regional  
Development  
Republic of Latvia

# Planned activities in 2015

**II q.**

- Annually until May 1st to prepare and submit an information notice about GP and GPP realization, including in public administration;

**III q.**

- Prepare the order of the Cabinet of Ministers with a request for compulsory annually achievable share of GPP in the total amount of the purchases made

**IV q.**

- Develop Cabinet of Ministers regulations which regulate GP and GPP implementation, supervision monitoring, develop evaluation of the life cycle of specific groups of goods;

**III;  
IV q.**

- To organize regular methodological seminars and trainings for merchants, state and municipal institutions about GPP performance and implementation in the procurement;

Ministry of Environmental  
Protection and Regional  
Development  
Republic of Latvia

# Planned activities in 2016

**II q.**

- To develop a life cycle expenses evaluation model for certain groups of goods;

**II q.**

- Ensure that the life cycle cost assessment could be used for an evaluation of advantageous tender

**IV q.**

- To ensure a wider "green" catalogue choice in the Electronic procurement system;

Ministry of Environmental  
Protection and Regional  
Development  
Republic of Latvia

# Planned activities in 2017

**IV q.**

- Improving eco - label and promote environmental management systems

**IV q.**

- Create a special marking for GP/GPP recognition in Latvia

Protection and Regional  
Development  
Republic of Latvia

# Climate Change Financial Instrument

Climate Change Financial Instrument (CCFI) is a state budgetary programme of the Republic of Latvia, internationally known as Green Investment Scheme (GIS).

CCFI finances are based on revenues from the international emissions trading scheme under the Kyoto protocol.

The aim of CCFI is the reduction of greenhouse gas (GHG) emissions.

Ministry of Environmental  
Protection and Regional  
Development  
Republic of Latvia

# CCFI Summary on the Implementation of CCFI Tenders

First CCFI Open Tender was announced in July of 2009. Since then there were **16** Open Tenders organized.

Implementation of **2331** Projects are completed, **240** Projects are in the implementation stage.

More than EUR **204** million have been committed for Project implementation from CCFI; contracted CCFI financing amounts to more than EUR **192** million.

The following measures are being implemented within the framework of the projects:

- increase of energy efficiency;
- development of technologies reducing GHG emissions;
- technology conversion from fossil to renewable energy resources;
- providing information to the society regarding the importance and possibilities of GHG emission reduction;
- reducing GHG emissions in transport sector.
