GPP 2020: Results and room for replication

GPP 2020 Training in Portugal – main findings

Training provided to 100 people.

46% claimed that greened tenders/purchases after the GPP 2020 seminar.

Very good evaluation of the GPP 2020 training seminars.

Key aspects valued in the GPP 2020 training seminars: practical examples and exercises.

Content from the GPP 2020 training seminars that was used by the trainees in their work:

GPP 2020 case studies, GPP 2020 calculators.

GPP 2020 Training in Portugal – main findings

However, trainees consider that GPP 2020 calculators are difficult to use and require specific knowledge.

Direct results of the training: 6 tenders with low carbon criteria.

Product groups of the tenders of the trainees where GPP/LCPP criteria was included:

Electric vehicles;

Printing equipment;

Public works;

School transportation;

Electricity;

Buses.

GPP 2020 Training in Portugal – main findings

Trainees' perception is that the introduction of low carbon criteria in tenders will increase the risk of an unsuccessful tender, as they do not know well the market.

The development of a confidence environment between procurers and the trainer very important to base on the introduction of low carbon criteria in tenders.
