Philipp Tepper, ICLEI

Working Group “Services”

2nd Webinar: Low Carbon Service Contracts

2- Short Introduction to the Working Group Services – *Bettina Schaefer, Ecoinstitut*

Working Group “Services”

One of 3 Working Groups in GPP 2020 (Products, Services, Processes)

Aim of the Working Groups:

- To ensure effective sharing of experience, ideas and research between the consortium members
- To discuss the individual tenders to be implemented,
- To provide recommendations on available criteria and/or procurement models

Scope of the Working Group “Services”

- CO₂ reduction in services procurement has received significantly less attention than that in the procurement of goods and works.
- Increasing trend towards the contracting out of service provision to private companies = this procurement sector is becoming ever more significant.
- How to promote CO₂ reduction in service procurement, exploring best practice and new ideas from across Europe?
- *Examples: alternative contractual models such as energy performance contracting, setting minimum standards, monitoring performance etc.).*
